Submitted Code: 2 weeks, 5 days ago

Language: java

Edit Code

```
class Solution {
    public boolean isPowerOfTwo(int n) {
        if(n<1) return false;
        int val=n;

        while(val>1){
            if(val%2==0){
                val=val/2;
            }else{
                return false;
            }

        }
        return true;

    }
}
```
