Submitted Code: 3 weeks, 1 day ago

Language: java

Edit Code

```
class Solution {
    public boolean detectCapitalUse(String word) {
      boolean cap=true;
     if(word.length() <= 1)
             return true;
      else  {
     if((int)word.charAt(0) > 90 )
        cap=false;
    else{
        if((int)word.charAt(1) > 90)
        cap=false;
        else
            cap=true;
    }

        }
        for(int i=1;i< word.length();i++){
          if(cap ==true && (int)word.charAt(i) >= 97)
              return false;

            else if(cap== false && (int)word.charAt(i) <=90) return false;

        }

        return true;

    }
}
```
