```
1 class Solution {
2     public void moveZeroes(int[] nums) {
3         int j=0;
4         int temp=0;
5         for(int i=0;i<nums.length;i++){
6
7             if(nums[i]==0){
8                 boolean check=true;
9                 j=i+1;
10                while(check){
11                    if(j<nums.length){
12                        if(nums[j]!=0){
13                            nums[i]=nums[j];
14                            nums[j]=0;
15                            check=false;
16                        }
17                    }
18                    j++;
19                }else{
20                    return;
21                }
22            }
23        }
24    }
25 }
26 }
27 }
```
