Submitted Code: 2 weeks, 5 days ago

Language: java

Edit Code

```
 1   class Solution {
 2       public boolean isPowerOfThree(int n) {
 3           if(n<1) return false;
 4           int val=n;
 5
 6           while(val>1){
 7               if(val%3==0){
 8                   val=val/3;
 9               }else{
10                   return false;
11               }
12
13           }
14           return true;
15
16       }
17
18   }
```
