Submitted Code: 4 weeks ago

Language: java

Edit Code

```java
class Solution {
    public boolean containsDuplicate(int[] nums) {
        Map <Integer,Integer> map = new HashMap<>();

        for(int i=0;i<nums.length;i++){
            if(map.containsKey(nums[i])) return true;
            else {

                map.put(nums[i],0);
            }

        }
        return false;

    }
}
```
